

#testimonial

I felt quite elated when I was chosen by my coach to participate in the National Quiz. We prepared for each round of competition by studying from the Study Guide. We would then question each other to determine how much we retained and what areas we needed to sharpen up on.

I benefitted from participation in this Quiz since I acquired more knowledge about ACTT and the importance of an institution gaining accreditation status. The most important lesson I learnt was that teamwork is vital since, without my teammates and I working together and assisting each other in many ways, we would not have made it so far.

I would definitely encourage others to participate in the 4th version of the Quiz and I would do so by sharing my wonderful yet nerve-racking experience with them and I would also tell them about the prizes and knowledge that are available to them in the competition.
