Dr Kim William Gordon

Principal,
Telementoris
United States of America

Dr. Kim William Gordon holds his PhD in Educational Leadership with a focus on Educational Technologies. His published field of study is on the organizational implementation of AI augmented Adaptive Learning Technology within a highly modified educational setting.

In addition to having professional career experiences with business icons such as AT&T and IBM, Dr. Gordon has held numerous executive positions with start-ups, small business enterprises and has personally owned small businesses, all within the tech and edtech sector. In addition to his business background, his career has included teaching as adjunct for multiple universities and as the Dean of Academic Services at a four-year college.

It is within the context of this career framework, composed of a mix of technology, communications and higher education, that defines his expertise - he brings highly advanced communication and technology components into the lifeblood of the education sector.

In addition to his business pursuits, Dr. Gordon is currently the president of the not-for-profit Friends Of Hawn Association, as a Board Member at Large with the Scottish Saint Andrew Society of Greater Saint Louis and he sits in an advisory role with the Digital International Media Literacy Education project (DIMLE).
