The future of
Online Learning Quality:
Plenary Speaker

David Silver

Senior Manager,
Curriculum
Udacity
California, USA

David Silver leads the Curriculum Team at Udacity, which builds hands-on courses and Nanodegree programs for students around the world, in subjects such as artificial intelligence, data science, software engineering, cloud computing, and product management.

Mr Silver joined Udacity in 2016 to build the Self-Driving Car Engineer Nanodegree Program, which has trained tens of thousands of students to work on self-driving cars.

Prior to Udacity, Mr Silver was a Research Engineer at Ford Motor Company. Before Ford, he worked in engineering and product roles at Candidate Metrics, mSpot and AOL. He has an MBA from Stanford University, as well as a BSE in computer science from Princeton University.
